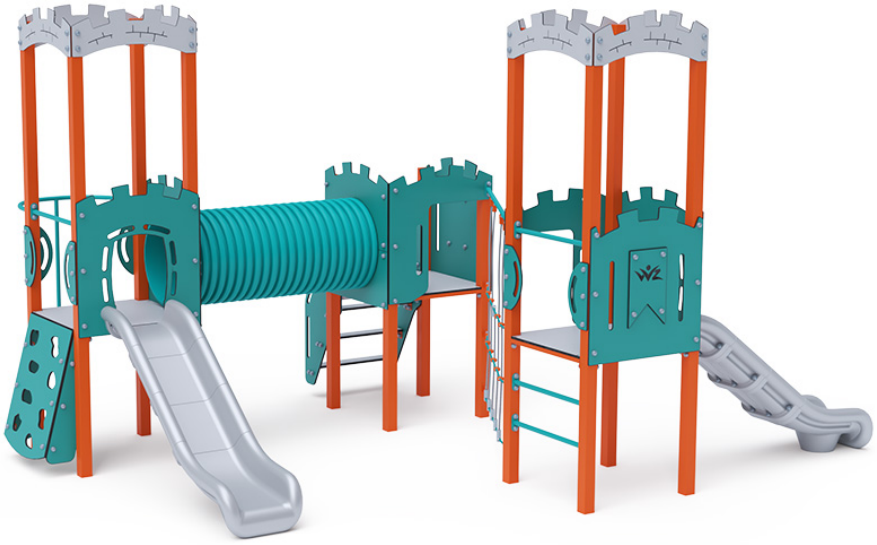
Triple-Tower Combined Play Structure - High
VVZ-VZ3-004-10-T



VVZ-VZ3-004-10-T Triple-Tower Combined Play Structure - High

This L-shaped triple-tower combined play structure features two towers with ramparts connected to a central tower by a diagonal climbing wall and a tunnel. Children can climb up via steps, a sloped climbing wall with handholds, a climbing pole, or a ladder, and come back down via one of two slides or the climbing pole. Its striking design invites play from a distance. The steel structure resists weathering thanks to hot-dip galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, preventing injury to children from sharp edges or fragments. The ropes are made of polyester fibers wound around a central reinforcement, a construction that increases their strength and resistance to mechanical wear. Polyester itself resists microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are made of stainless steel and covered with plastic protective caps for increased durability and safety.

Specifications

The Triple-Tower Combined Play Structure - High VVZ-VZ3-004-10-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	5.40 x 3.90 x 3.10 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	8.80 x 7.00 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, corrugated pipe, polypropylene rope, stainless steel fasteners
Weight:	610 kg
